

# The Handz of Ganz

Vol. 1 Issue 3 October 2004

## From Dr. Ganz

The school season has rapidly come upon us again and I am sure many of you are busy getting your kids back to school, running around like crazy with car pools and just can't find enough time in the day to complete anything yet alone everything. You truly have my sympathies...just remember though that summer is just around the corner and will be here sooner than you can imagine. So hang in there and all will be well. During these busy days I hope you will find time to read this brief newsletter and if you have any questions to give us a call. We look forward to your feedback and contributions to our newsletter.

*Thank you.*

*Cary*

## What's New?

**Introducing Invisalign®** a new and exciting way to straighten your teeth....**WITHOUT WIRES or those ugly braces!** Only 6% of the dentists in the U.S. are now certified to provide Invisalign®, *the first wireless braces*. I am now one of those chosen few. Invisalign® is totally invisible and can give you the beautiful, straight smile you've always wanted. It works through a series of **invisible, removable, and comfortable** aligners that no one can tell you're wearing. So you can smile more during treatment as well as after.

**Invisalign®**

## How Does Invisalign® Work?

- You wear each set of aligners for about 2 weeks, removing them only to eat, drink, brush, and floss.
- As you replace each aligner with the next in the series, your teeth will move - little by little, week by week - until they have straightened to the final position we have prescribed.
- You'll visit our office about once every 6 weeks to ensure that your treatment is progressing as planned.
- Total treatment time averages 9-15 months and the average number of aligners worn during treatment is between 18 and 30, but both will vary from case to case.

## Why Invisalign®?

- **Invisible**, so no one can tell you're straightening your teeth. So now you can smile more *during* treatment as well as after.
- **Removable**, so you can eat and drink what you want while in treatment, plus brushing and flossing are no problem.
- **Comfortable**, because it has no metal to cause mouth abrasions during treatment. And no metal and wires usually means you spend less time in your doctor's office getting adjustments.

Invisalign® also allows you to view your own virtual treatment plan when you start, so you can see how your straight teeth will look when your treatment is complete.

## **Call us for a complimentary Invisalign® Consultation Today!**

Next is the addition of **Deep Bleaching** to our whitening protocol. This is a new technique that provides a much greater degree of whitening than previously available especially for those difficult cases or for those of you who would just like your teeth even whiter than previously possible. Please ask Michelle or Maureen about this exciting new technique.

**Deep Bleaching**

**Joke of the Month:** A man's house is on fire. He runs out of the house with his son and tells him to wait outside. Then he runs back in and gets his daughter and brings her outside. Then his wife. Then the dog. Then he goes back in a couple of times without bringing out anybody.

So a fireman asks him, "Why are you going back in there?" The man replies, "I'm turning over my mother in law."

## **Quote of the Month**

Happiness is nothing more than good health and a bad memory.

**Albert Schweitzer (1875 - 1965)**

*As always we appreciate the kindness expressed by the referral of your family, friends and business associates. Please ask them to mention your name when they call.*
